

# Compassionate Reconciliation Commission

## **Opportunity Statements:**

In light of the current circumstances in our community, the SSSC and our family of organizations have an opportunity to offer pathways of healing and reconciliation for all those in our global community who would like to take part.

We recognize that we have a responsibility to support the mental, emotional and physical health of our global community. And we would like to further the work of peace making, healing and compassionate reconciliation.

**Proposed next step:** Create a commission populated with individuals interested in doing and furthering this work. The purpose of this commission is to engage the healing process in our community.

## **Charter:**

The Commission will work with all the organizations and individuals to understand the needs and requests for reconciliation and healing. It will then create, and advocate for plans to be implemented.

## **This commission will:**

- Identify and work with a consultant to create and implement a plan for Restorative Justice.
- See healing needs in the community and propose resources and implement procedures to address those needs.
- Create a budget and bring funding requests to the SSSC for approval.
- The commission will regularly inform the SSSC of their work.

## **Who:**

- Kulwant Kaur, Viriam Singh and Guruka Singh (Representatives of SSSC)
- Karan Kahran Kaur (as representatives of next gen and reporters of harm)
- Snatam Kaur (as representatives of next gen and reporters of harm) (?)
