

Ways to contribute to Seva the Planet

Planting Trees

Planting trees offers numerous environmental benefits, including: fighting climate change by absorbing carbon dioxide
cleaning air and water
protecting soil from erosion (*key in flood areas)
and providing habitat for wildlife

Build a community garden box

Community garden boxes are a way to share food with your neighbors. This is an easy way to grow lettuce, herbs and healthy food choices.

Cleaning Green

Green cleaners are environmentally friendly, often non-toxic, and biodegradable, reducing harm to both the environment and human health, while also minimizing the risk of chemical exposure and potential health issues

Garbage clean up

reducing pollution, preserving ecosystems, safeguarding wildlife, and promoting resource conservation
